

Task Management App Execution Plan

Name: Leng Wei Cong, Justin

Matriculation Number: A0241293J

Use Case Diagram

User Requirements

1. CRUD of tasks
2. Tagging system that categorizes tasks
3. Login for personalized tasks manager (To make it interesting, I would be adding a MetaMask login method)

Frontend

- ReactJS will be used for the development of frontend

Backend

- Ruby on Rails will be used for the development of backend
- Ruby on Rails will be providing the necessary API for the interaction with ReactJS

Deployment

- AWS will be used for deployment of the application
- Docker will be implemented for its container
